

EverGuard® TPO GAF Scupper

Description:

Increase efficiency when addressing this roof drainage feature with factory-built EverGuard® Scuppers. These single-ply roofing system preformed accessories provide roofing contractors with an effective, easy-to-install detail. GAF manufactures these and other accessories from its proven, durable EverGuard® TPO single-ply reinforced membrane. GAF TPO accessories can help you reduce installation costs, risk of leaks, and callbacks, while helping you create a uniform look.

Application:

Preformed accessories may be installed on mechanically attached, fully adhered, or self-adhered EverGuard® and EverGuard® Extreme TPO roofing systems, using conventional techniques. See published application and specifications manual for detailed instructions.

Product Information:

EverGuard® TPO Scuppers are constructed from metal coated with unreinforced 55-mil TPO membrane. The design eliminates the need for flashing to waterproof the wall opening.

E2 275x75mm

100x100mm,
(Facer not included)
